

SURAJ RAI

Senior Full-Stack Software Engineer

Chitwan, Nepal | +977 984 532 0407 | shuraj.shampang@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years of experience designing and delivering scalable, high-performance web and mobile applications across healthcare, HR, logistics, and PaaS platforms. Deep expertise in React, React Native, Node.js, Fastify, Spring Boot, and Laravel, with a strong track record in microservices architecture, REST API design, CI/CD automation, and cloud deployment (AWS, Docker). Currently leads architecture and technical direction for multiple production platforms, mentors engineers, and drives cross-functional delivery — improving API latency by ~30% and cutting manual release effort by ~70% through data-driven process and automation improvements.

CORE SKILLS

Languages: TypeScript, JavaScript, Java, PHP, SQL

Frontend: React.js, React Native, Vue.js, Next.js, Redux, HTML5, CSS3

Backend: Node.js (Express, Fastify), Spring Boot, Laravel, Symfony, GraphQL, WebSocket, Kafka

Databases & Search: MySQL, PostgreSQL, MongoDB, MariaDB, Elasticsearch, Redis

Cloud & DevOps: AWS, Docker, Docker Swarm, Portainer, Jenkins, CI/CD, Traefik, Ansible, Nginx, Git

Monitoring & Observability: Grafana, Prometheus

Testing & Quality: Jest, Mocha, Cypress, Postman

Practices: Microservices Architecture, RESTful API Design, HL7 FHIR, Agile/Scrum, Technical Leadership, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer

Nov 2025 – Present

Dzango Technologies | Hong Kong (Kathmandu-based)

- Lead architecture and technical design across healthcare, HR, and PaaS platforms, aligning engineering decisions with industry best practices and business priorities.
- Drive design of scalable microservices and distributed systems using Node.js, Fastify, Spring Boot, and React, setting technical direction for the wider engineering team.
- Define engineering standards and review system designs across teams, establishing clean-architecture guidelines that reduced onboarding time for new engineers.
- Mentor a team of junior and mid-level engineers, running code reviews and technical 1:1s that measurably improved code quality and shipping velocity.
- Led performance optimization initiatives that improved API latency and system efficiency by ~30% through data-driven profiling and targeted refactors.
- Redesigned CI/CD and deployment strategy, improving release reliability and cutting manual deployment effort by ~70%.
- Set up Grafana/Prometheus monitoring across production platforms, improving visibility into system health and incident response time.

Full-Stack Engineer II (SE2)

Nov 2022 – Nov 2025

Dzango Technologies | Hong Kong (Kathmandu-based)

- Delivered complex full-stack features across multiple production applications, using Redux for state management at scale.
- Served as feature technical lead, mentoring junior engineers and running code reviews to enforce best practices.
- Partnered directly with customers and stakeholders to translate requirements into technical solutions that improved user experience.
- Broke large initiatives into scoped Jira/Notion tickets with clear acceptance criteria, improving cross-team planning and delivery predictability.
- Built scalable REST APIs, background jobs, and real-time data integrations that improved application performance and user engagement.

- Collaborated with product, QA, and DevOps to ensure stable releases and smooth delivery cycles.
- Built internal reusable component libraries, improving codebase modularity and front-end development efficiency.

Full-Stack Engineer I (SE1)

Jul 2020 – Nov 2022

Dzango Technologies | Hong Kong (Kathmandu-based)

- Developed frontend and backend features across React, React Native, Node.js, and Spring Boot with a focus on user experience.
- Implemented RESTful APIs and integrated third-party services to streamline core user workflows.
- Participated in sprint planning and estimation in an Agile environment, consistently meeting delivery deadlines.
- Maintained CI/CD pipelines and deployment workflows, contributing to release automation.
- Debugged production issues and improved system reliability and performance.

Associate Software Engineer

Mar 2018 – Jul 2020

Dzango Technologies | Hong Kong (Kathmandu-based)

- Implemented UI components and backend endpoints under senior engineer guidance on enterprise healthcare and logistics applications.
- Wrote unit tests and fixed bugs, contributing to measurable improvements in application stability.
- Learned and applied REST API design, Git workflows, and Agile methodologies.

KEY PROJECTS

Embleema — *Healthcare & Research Platform*

- Contributed to a regulatory-grade research platform enabling secure patient data collection, real-world evidence generation, and decentralized clinical workflows.
- Implemented HL7 FHIR-based data models to standardize clinical data exchange and interoperability.
- Used Redis for caching frequently accessed data, reducing database load and improving response times.
- Tech stack: React, React Native, Express.js, Spring Boot, Microservices, MariaDB, MongoDB, Redis, FHIR

Airwaybill — *Logistics Platform*

- Implemented shipment lifecycle, tracking, and operational workflow modules with scalable APIs for real-time logistics processing.
- Tech stack: React, Spring Boot, MariaDB, Android (Java), iOS (Swift)

Bimbo — *Content Operations Platform*

- Developed content management microservices enabling lifecycle workflows, permissions, and orchestration for large-scale content operations.
- Building Elasticsearch-powered search into the content platform to improve content discovery and retrieval (ongoing).
- Tech stack: React, PHP, Symfony, MariaDB, Node.js (Express), Elasticsearch, Microservices

12Deg — *Platform-as-a-Service (PaaS) System*

- Built platform services for application deployment, environment management, and release workflow automation in a modular PaaS.
- Implemented WebSocket-based real-time updates for deployment and release status.
- Tech stack: React, Fastify, PostgreSQL, Docker, WebSocket

EDUCATION

BSc in Information Technology

April 2014 – April 2018

Sikkim Manipal University, Gangtok, India
